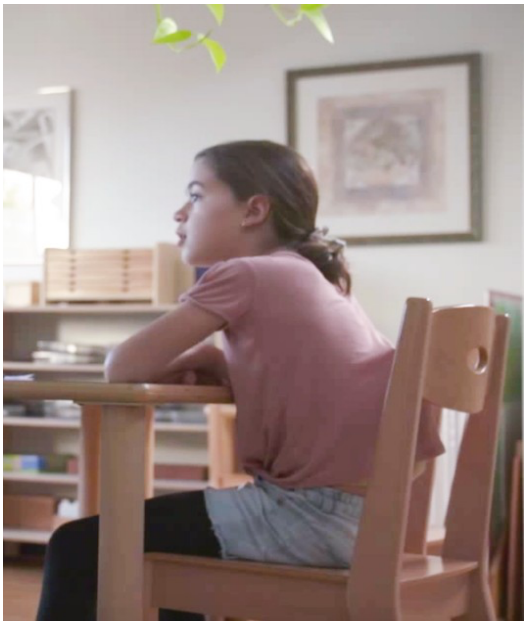
Interviewing Children

A skills-based course for a range of professionals

COURSE OVERVIEW



This innovative course is ideal for anyone who interacts with children. It is the culmination of over 10 years' research and development by the Centre for Investigative Interviewing. The Centre is a global leader in the field of interviewing children (investigativecentre.com).

The course is self-paced and takes approximately 20 hours to complete. It focuses on how to interview children for workplace investigation purposes. It is practical and interactive in nature, including a simulated (avatar) interview, professional films with quizzes, discussion forums, and one-on-one sessions (over the phone or web) with a trainer. A certificate is provided on completion.

LEARNING OUTCOMES

The course focuses on the questioning strategies needed to: build rapport, encourage disclosures, keep the child talking (and steer them to important details), and minimize error while making the interview as stress-free as possible. Enrolees also learn how to apply these interview techniques across cultures and for persons with complex communication support needs.

EVIDENCE BASE FOR COURSE EFFECTIVENESS

Evaluation research using control groups and standardized assessment measures reveals that participants who complete this course are highly skilled in using a range of good questions, their interviews are shorter without loss of important information, and their skills are maintained well over time.

ENROLMENT

CPA members can access an exclusive discounted rate of $750 CAD to enrol. This covers full access to the online learning environment for 6 months, and a trainer.

Please email cii.training@griffith.edu.au for registration and payment details. Please ensure you provide your full name and use the email associated with your CPA account. You must be a member of the CPA to enrol at the discounted rate.
